Horizon Beach Resort Environmental Policy

At the '**Horizon Beach Resort**' we recognise the impact of our business on the environment and are committed to conducting the hotel in a way that ensures environmental sustainability.

We are undertaking the following actions to strive to responsibly lessen our impact on the environment wherever we sensibly can, by:

- ❖ To reduce our carbon emissions, water use and waste production by 10% before the end of July 2022 through implementing the following steps:
 - Regularly recording and monitoring the amount of energy and water we use, as well as the waste we produce.
 - Wide use of solar power. Use of geothermal power over to 50% on the facilities.
 - Operating a 'switch off' policy for office staff to turn off computer equipment and printers when not in use.
 - Sourcing more sustainable products to replace single-use plastic items.
 - Recycling paper, newspapers, glass, batteries, fluorescent and long life bulbs, cans and cartridges.
 - Reducing our usage of paper by printing double sided.
 - Begin irrigating our garden at night.

- ❖ To minimise all forms of pollution from our business operations by implementing the following steps:
 - Reducing our usage of harmful cleaning chemicals and replacing these with eco-friendly products wherever possible.
 - Replacing refrigerators with ozone-friendly models by the end of 2021.
 - Increasing the waste baskets in beach.

- ❖ To have a positive impact on local biodiversity in our area by taking the following steps:
 - Planting native vegetation in our garden that attracts bees by the beginning of 2022.

We regularly train all our employees and educate our clients, suppliers and partners to encourage them to help support our environmental management system and contribute to our progress.
